goodweb.com

Good web is an integrated team of web designers, developers and software engineers that solve the problems about creating websites, web designs. We also provide the services for app designs.

Good web provides a lot of solutions for web designs, and app designs. "Concentration makes profession!" We focus on the designs that helps our teams become very professional teams. Our team can catch the style of every website, according to web creators' requirement. We will find the most suitable style for the website. Additionally, we have own strategies to help web creators to improve the user experience. Our goal is to make the website useable, beautiful, accessible. We also put our focus on web creators, when they want to change the style or some part of works. We will get together to discuss the problems immediately.

PERSONAS

Penny, 30-year-old web designers. Her major is information science. In the work, she always works closely with customers, listen to their thought, requirements and problems. She said:" You cannot success without listen to customers' ideas carefully. She has 4 years of designing web pages by using HTML and CSS which can help her to do the web design professionally.

Michael, 35-year-old. His major is Computer Science. He always focuses on responding customers' emails. He said: "The best way to find the problems of the web is to listen to the users. They will find a lot of problems while using the web and send the feedback." He uses python and Java to do the code. He knows how to deal with the problems in different platforms like JavaScript, CSS, HTML and Python.
